China's Polyols Exports Saw an Unexpected Increase in the First Four Months

2019-06-26

According to PUdaily, the volume of China's polyether polyols exports for the January-April period reached 214,500 tons, up 20.90% year on year. And export volumes for the individual months were all higher than those for the same periods last year. In the context of escalating Sino-US trade war, why did polyols exports see an increase instead of decrease? What were the major drivers? Did the exports to the United States decrease? On last August 23, the United States formally imposed a 25% additional tariff on polyether polyols imported from China. This undoubtedly increased the costs for polyols exporters and thus reduced the competitiveness of their prices... [More](#)
